project with inspiring solutions

# Vir2TEX innovative training content and interactive platform with you

## The Aim of Project

The aim of the project is to develop Digital Learning Materials for Sustainable Textile Education. The developed new education materials will engage students in immersive learning experiences whether teaching in class or remotely.

This project explores the potential of virtual reality (VR) for deepening understanding and enhancing learner engagement by eliminating the screen and placing learners in the middle of real situations through utilizing VR 360 video.

## Outputs

- An e-learning platform to host the project intellectual outputs and as a course management system
- E-learning content for the teaching and learning strategies
- Virtual learning environments and mobile implementation
- The effectiveness and efficiency of virtual learning environments evaluation
- A book of guidelines for teacher/trainers guidelines in multiple languages
- Curricula, syllabus and framework of instruction, policy recommendations

## Target Groups

- Textile engineering, fashion design and vocational school teachers, trainers and mentors
- New employees of private companies operating in the textile industry
- Textile communities, universities, public authorities, chambers of commerce, chambers of industry
- Students and educators of textile education in general lifelong learning via sustainable learning and awareness
